

MORNSUN®

IF_S-2W Series

2W, FIXED INPUT, ISOLATED & REGULATED
SINGLE OUTPUT DC-DC CONVERTER

MODEL SELECTION

FEATURES

- Compact size
- SIP Package
- Isolation voltage: 3K VDC
- Operating temperature range: -40°C to +85°C
- Good temperature characteristic
- Internal surface mounted design
- International standard pin-out
- No external component required
- RoHS Compliance
- EN60950 approval

APPLICATIONS

The IF_S-2W Series are specially designed for applications where a group of polar power supplies are isolated from the input power supply in a distributed power supply system on a circuit board.

These products apply to:

- 1) Where the voltage of the input power supply is fixed (voltage variation $\leq \pm 5\%$);
- 2) Where isolation is necessary between input and output (isolation voltage $\leq 3000\text{VDC}$);
- 3) Where the regulation of the output voltage and the output ripple noise are demanded.

PRODUCT PROGRAM

Certification	Model	Input Voltage (VDC)		Output Voltage (VDC)	Output Current (mA)		Input Current (mA)(Typ.)		Efficiency(%) @Max. Load

OUTPUT SPECIFICATIONS

Item	Test condition	Min.	Typ.	Max.	Unit
Line regulation	For V_{in} change of $\pm 5\%$	--	--	± 0.5	%
Load regulation	10% to 100% load	--	± 1	± 2	
Output voltage accuracy	100% load	--	--	± 3	
Temperature drift	100% load	--	--	0.03	%/°C
Output ripple*	20MHz Bandwidth	--	20	30	mVp-p
Output Noise*	20MHz Bandwidth	--	50	150	

*Test ripple and noise by "parallel cable" method. See detailed operation instructions at DC-DC Application Notes.

COMMON SPECIFICATION

Item	Test Conditions	Min.	Typ.	Max.	Unit
Storage humidity range	Non condensing	--	--	95	%RH
Operating temperature		-40	--	85	°C
Storage temperature		-55	--	125	
Lead temperature	$T_a = 25^\circ \text{C}$	--	40	60	
Temp. rise at full load	1.5mm from case for 10 seconds	--	--	300	
Cooling		Free air convection			
Case material		Black flame-retardant and heat-resistant plastic (UL94 V-0)			
Short circuit protection		Continuous			

Switching Frequency	100% load, nominal input	--	100	300	KHz
MTBF	MIL-HDBK-217F@25°C	3500	--	--	K hours
Weight		--	2.4	--	g

ISOLATION SPECIFICATIONS

Item	Test condition	Min.	Typ.	Max.	Unit
Isolation voltage	Input-Output, tested for 1 minute and leakage current less than 1 mA	3000	--	--	VDC
Isolation resistance	Input-Output, test at 500VDC	1000	--	--	MΩ
Isolation Capacitance	Input-Output, 100KHz/0.1V	--	60	--	pF

TYPICAL CHARACTERISTICS

OUTLINE DIMENSIONS & PIN CONNECTIONS

APPLICATION NOTE

1) Requirement on output load

In order to ensure the converter can work reliably with high efficiency, the minimum load should not less than 10% rated load when it is used. If the needed power is indeed small, please parallel a resistor on the output side (The sum of the efficient power and resistor consumption power is not less than 10%).

2) Recommended circuit

If you want to further decrease the input/output ripple, an "LC" filtering network may be connected to the input and output ends of the DC/DC converter, see (Figure 1).

(Figure 1)

It should also be noted that the inductance and the frequency of the "LC" filtering network should be staggered with the DC/DC frequency to avoid mutual interference. However, the capacitance of the output filter capacitor must be proper. If the capacitance is too big, a startup problem might arise. For every channel of output, provided the safe and reliable operation is ensured, the greatest capacitance of its filter capacitor sees (Table 1).

Vin (VDC)	Cin (μF)	Vout (VDC)	Cout (μF)
5	4.7	5	4.7
12	2.2	--	--
24	0.47	--	--

It's not recommended to connect any external capacitor in the application field with less than 0.5 watt output.

3) Overload Protection

Under normal operating conditions, the output circuit of these products has no protection against over-current and short-circuits. The simplest method is to connect a self-recovery fuse in series at the input end or add a circuit breaker to the circuit.

4) Input Over-voltage Protection Circuit

The simplest device for input over-voltage protection is a linear voltage regulator with overheat protection that is connected to the input end in series (Figure 2).

(Figure 2)

5) When the environment temperature is higher than 71° C, the product output power should be less than 60% of the rated power.

6) It is not recommended to increase the output power capability by connecting two or more converters in parallel. The product is not hot-swappable.

Note:

1. Operation under minimum load will not damage the converter; However, they may not meet all specifications.
2. Max. Capacitive Load is tested at nominal input voltage and full load.
3. Unless otherwise noted, All specifications are measured at $T_a=25^\circ\text{C}$, humidity < 75%RH, nominal input voltage and rated output load.
4. In this datasheet, all test methods are based on our corporate standards.
5. All characteristics are for listed models, and non-standard models may perform differently. Please contact our technical support for more detail.
6. We can provide product customization service, please contact our technicians directly for specific information;
7. Products are related to laws and regulations: see "Features" and "EMC";
8. Our products shall be classified according to ISO14001 and related environmental laws and regulations, and shall be handled by qualified units.
