600 Watts in the palm of your hand

The NEVO+600M modular configurable medical power supply is the smallest in its class and the ultimate solution for demanding medical applications where size, power density and weight matter. Its tiny footprint of 5" x 3" x 1.61" weighs only 600 grams and delivers an incredible 600 Watts - equating to a power density of 25 Watts per cubic inch. The input module can accommodate up to four isolated output modules which can be configured into a high power 5"x 3" single output power supply or a multiple output power supply with up to 8 isolated outputs. Standard features include intelligent fan control providing optimised airflow for various load and temperature conditions, wide output voltage adjust, parallel and series connection of modules and an isolated 5V 1A bias supply. A low noise fan option is available that allows you to use this innovative power supply in even the quietest of environments. PART NUMBERING SYSTEM

Our design team will assist with value-add requirement if an application requires standard/non-standard accessories or non-nominal voltage settings. Once approved, the factory will issue a 3 or 4 digit code for your specific configuration which can be used for all future orders of the same configuration. When ordering an input unit with no outputs inserted, simply order NEVO+600M
